

Right Networks Launches Foxit Phantom PDF Business within Hosted Environment

HUDSON, N.H (July 9, 2019) – [Right Networks](#) has launched Foxit Phantom® PDF Business within its hosted environment, giving customers a fast, intuitive, and affordable PDF editing tool that supports the entire PDF lifecycle. With this add-on, Right Networks customers can: export PDFs to MS Office; track document usage, page views and changes; and scan and edit documents in one step.

“We’re always seeking best-in-class add-ons for our customers, and with Foxit Phantom PDF Business they can quickly create and edit PDFs, and easily share and collaborate with their teams and customers, all in the secure Right Networks environment,” said Joel Hughes, CEO of Right Networks.

Included among Foxit Phantom PDF Business’ popular features are: intuitive version control; optional password protection and access rights; automatically-installed printer properties; and a Word-like ribbon to edit content.

Customers can purchase this as an add-on directly from the Right Networks sales team and add it into their account.

Right Networks delivers the first, and only, hosted solution supporting 24x7 data transfer and synchronization between QuickBooks Desktop and the variety of third-party SaaS applications used by its diverse customer base. The highly secure, proprietary environment enables the Right Networks team to deliver its solution with no scheduled downtime, while the cloud-connected app ecosystem gives customers the ability to work from anywhere, at any time.
