RECEIPT BANK AND RIGHT NETWORKS LAUNCH
NEW QUICKBOOKS DESKTOP INTEGRATION

Washington, D.C. November 9, 2020, : Receipt Bank, the leading digital accounting platform, has officially launched its Quickbooks Desktop integration to the Right Networks [Application Ecosystem](#).

This means that Right Networks users now have the ability to combine Receipt Bank's powerful automation with Quickbooks Desktop functionality. They can speed up data management, as well as work with more businesses without having to change processes.

"This new integration combines the functionality of desktop accounting with the speed and accuracy of the cloud. We are excited to partner with Right Networks and add more users to Receipt Bank's growing community of 50,000 accounting professionals," says Kalliopi Vlastos, US General Manager at Receipt Bank.

Additionally, users will have access to direct publishing of line items, unpaid bills, paid bills, expense reports and credit notes straight from Receipt Bank to Quickbooks Desktop - meaning there is no need to waste hours manually updating records.

"The combination of Receipt Bank and Right Networks delivers a seamless cloud-based digital accounting solution with QuickBooks Desktop that automates the tracking and processing of receipts, bills and more, transforming them into digital financial information that can be shared instantly," said Joel Hughes, CEO of Right Networks.

"We're pleased that this expanded capability is now an option for the 180,000 cloud-hosted QuickBooks desktop users on Right Networks."

The integration is currently available in the U.S. to Receipt Bank Partners on Streamline and Optimize plans, as well as Right Networks users on Business Cloud and Application Cloud plans. You may [click here](#) to learn more about the integration.
